History: The Company was a venture started in 2010 by a group of engineers to provide sale and services in process heat (Boiler, Hot water Generator) equipment and water/ waste water treatment plant with its related accessories.

00 National Economics Growth Times

The vision was to establish a marketing and servicing organization that offered the best in industrial products and technical services to the customers. The company has grown to become one of the pioneer privately owned businesses by highly experienced persons, providing heating water, waste water treatment, energy saving solutions and industrial products and services in the NCR. The organization is active in North India with offices in Delhi, Gurgaon, Alwar (Rajasthan) & Neemrana, Dist. Alwar.

Selected 2012-14

Achievements: We are a One Stop Complete Process Heat Management,

right from equipment for the requirement of heating / cooling of treated / raw water to suit the desired process / utility and eventually equipment services for its proper and efficient performance is undertaken. The enhanced requirement of economic and technically suitable process water has fetched everyone's

attention toward treatment and recycling of industrial and domestic waste water. Our regular endeavour has made us pioneer in the field.

Market: Our Marketing / Service organization is active in North India with offices at Delhi, Gurgaon and Alwar. We serve food, automobile, edible oil refining and other industries in NCR. We are dealing in branded products of Hermax Ltd.

Recent Developments: We have several new developments in the waste water treatment methods of primary and secondary treatments. Wastewater treatments have become an area of global focus as individuals, communities, industries and nations strive for ways to keep essential resources available and suitable for use.

Expansion Plans: We are planning to develop optimized plan of centralized and decentralized waste reuse systems for housing and industrial development in the urban area.

Facilities for Staff: Recreation facilities are given to the staff in different ways as it is essential for good and efficient performance of an individual. Work-related tasks are given to employees as a source of recreation.

Mantras to become Successful Entrepreneur: For an effective and successful business one should truly believe in one's business and in the goods and services that they sell. No person can build a successful business alone; it is a task that requires a team that is as committed to the business as you are. Only then an entrepreneur, along with his staff, can achieve greater heights. Success is a reward of each individual's hard work and dedication towards work. And without a social support nobody can rise up in their aspirations

Corporate Social Responsibility: We have plans to provide sponsor mid-day meal facilities for unprivileged children at a private associations in Alwar.
