Established : April 1989

Products: Marine and General Engineering projects, Dredging, ship repairs. Construction of Vessels, under water and surface pipe laying, heavy erections and installations, marine survey and consultancy under taking of heavy, risky and intricate tasks. To make possible the tasks which are most difficult!

History: IndoJap shipyard was established in the year 1989 jointly by 3 experts in the field having joint venture with a Japanese firm in Yokohama. Their expertise in Marine Engineering and allied Industries has become a reckoned name in this field. The organization is managed by professional Marine Engineers having vast experience in the various fields of engineering and business. During the past 17 years the specialized technical expertise shown in the field of construction, repairs, maintenance of ships, tugs, barges on turnkey basis has earned good reputation for IndoJap Shipyard.

Achievements:

Recently, in the project of New Refinery at Kuwait, 32 kms of pipeline upto 5 feet dia(60 inches) in size, was completed and commissioned. We also have received the 1 million hours safety Award, Excellency Award for performance.

Market: The dredging projects are in great demand at various parts of the country. The underwater and surface pipe laying projects are also some of the several ongoing projects. Heavy erections and installations are done in various parts of the country and at different industries.

Recent Developments: Cochin Port Trust has short listed us to establish a new shipyard in joint venture with Cochin Port Trust. The project is being planned with the partnership of Damen shipyard of Holland.

Promotion: M/s Indojap Shipyard was promoted in 1989 with a Japanese company tie up. All the new fields were started in different engineering versatile operations with the technical knowhow of Indojap shipyard.

Expansion: Setting up of a new shipyard in 46 Acres of land in Cochin Port Trust area with 1100 meters of water frontage on the ships channel in Cochin. Dredging and consultancy services.

Facilities for Staff: The staff and workers are being provided with all the required amenities. Often the staff and workers are sent for outings and recreations, picnics, trips etc. The entertainment of the company staff and workers are taken care of.

Brand Value: A brand is of great value because the company's credentials and level of standard rises to a higher level and this should be maintained at all times. This will develop confidence of the customers in our products.

Mantras: Sheer hard work, commitments to the assignments taken up timely, delivery of products and projects undertaken move in line with the advanced technology and to the demand of the customers.
