

Selected 2012-14

Director : Mr. J. K. Patel

Established : 1995

Products: Plastic Agricultural 'ISI' Sagar brand foot valves, Air valves, N R V Ball valves and blue threaded wire fittings, Tub cocks, sanitary ware items. Our products are low friction and made with standard quality and with precision accuracy.

History: All partners hail from Agri-family and a desire to produce quality products. We started production in a very small space and limited machinery. Now after adopted latest technology with 100% automation, we have gained ISO 9000: 2008.

Achievements: Our foot valves is low friction foot valves, this gives an average energy saving of 10% to 12%. Our products have "ISI" mark from Bureau of Indian Standard.

Market: Generally our product has market all over the country. There is a bright scope for our products in markets like Nepal, Bangladesh etc. We are also trying to launch our products in Arab countries through "Arabtrad World".

Brand Value: Our products are ISI-approved, energy saving, affordable and precisely manufactured without compromise in quality; hence it is widely accepted across the country. Overwhelming response of our dealers and the end users' satisfaction in our product is always a source of inspiration for us.

Recent Developments: We have introduced fully automatic machinery to produce our product from gate valve, ball valves and wide range of Valves - 15 mm to 120mm size, plumbing accessories, garden pipes and wide range of threaded pipe fittings.

Promotion: For promoting our products we participate in melas and trade fairs across the country. We also advertise on hoarding at prime locations in various cities. Besides we arrange in-field demonstrations to show the benefits of our products.

Expansion Plans: Research by our team, with adoption of modern technology, for new products is continuously going on. We add 3 to 5 new products every year.

Facilities for Staff: We have arrangement of canteen where we have tied up with provider of good quality refreshment items. Beside good quality water, better arrangement of sanitation block, good ventilation and enough fans for protection from heat.

Mantras to become successful entrepreneur: Our firm's special mantras are hard work, self improvement, honesty, quality product at affordable price energy, saving for green revolution and a pollution free nation.

Corporate Social Responsibility: We want to see everybody happy. We spend 5 to 10% of profit for the upliftment of "Below Property Line" residents in our area, by providing them help with food, health and education.
