

S.B. Industries

Selected 2012-14

Brand Value: Indian Railway has selected our brand "SBI" and is approved by CORE/ALD & RDSO/LKO. We are using "SBI BRAND" all over India.

Director : Mr. Debabrata Das
Established : 1967

Products: Gravity and Pressure non ferrous die cast component, copper, Aluminum base alloy as per IS:3091 & IS:617 used in Indian Railways, OHE fittings clamps, connectors isolators and OHE ancillary items as per RDSO drawing no. approved by CORE / RDSO/ALD/LKO.

History: In 1967 S. B. Industries established a reputation in the field of manufacture and marketing of various components on fittings in gravity and pressure die-casting of both Aluminum and copper base alloys along with high voltage air break isolator for electrical supply network from live transmission and distribution system for substations in Indian Railways. We have well equipped foundry division with oil fired furnaces on latest pressure die casting machine for melting and casting machine shop with ancillary item: rivets, split pin, etc.

Achievements: We have a good quality assurance plan and well equipped physical and chemical test laboratories.

Market: The company is quite cable of servicing any market in India as well as throughout the world. The company, with immense exposure to the global market, is ready to face the challenging needs of today's competitive technology with its existing manufacturing facility.

TESTING FACILITIES

Physical

Chemical

Electrical

Recent Developments: Expansion in terms of Buildings for more space in factories, as well as office maintenance and quality control system.

Promotion: We have earned a name for quality assurance. We have steadily built up a balance quality control system and close monitoring is done at every stage – right from incoming raw material to finished products.

Expansion Plans: We plan to expand our work area to 15000 square feet. Land for expansion has already been procured.

Facilities for Staff: We give recreation facilities such as tour and excursion for employees and staff members.

Mantras to become successful entrepreneur: Hard labour is the mantras for success.

Corporate Social Responsibility: We train Engineering student in Diploma and Degree courses with some facilities. We also arrange donations to develop local school for educational, social and moral development.
